let's change
YOU. US. THE WORLD.

THE HAGUE
UNIVERSITY OF
APPLIED SCIENCES

Welcome

On changing the world together

How do we increase opportunities for people in our metropolitan environment? How do we create a sustainable energy supply and circular economy? How do we ensure that the elderly can continue to live comfortably in their own homes longer, and how can new technology help?

These are just a few of the questions that The Hague University of Applied Sciences, a committed community of students and staff, develops answers to on a daily basis. We do this through education and research in close cooperation with the professional field in the Greater The Hague region, and are guided by our mission and our core values..

'Let's change. You. Us. The world'. Today more than ever, our THUAS slogan has taken on even greater significance. In a rapidly changing world, we offer our students a broad education in an inquisitive learning culture, so that when you graduate, you are adaptive and resilient – ready to take on the world as a global citizen with a moral compass.

As an internationally oriented knowledge institution, we offer a wide range of flexible and interdisciplinary degree programmes, for young adults and experienced professionals. The flexible structure of our education gives you freedom of choice in the composition of your personal learning pathway. Through co-creation, we respond to the changing needs of society. Our education and research are shaped by our students and staff in close consultation with the professional field. This ensures that our graduates have the right knowledge and skills when they enter the workforce.

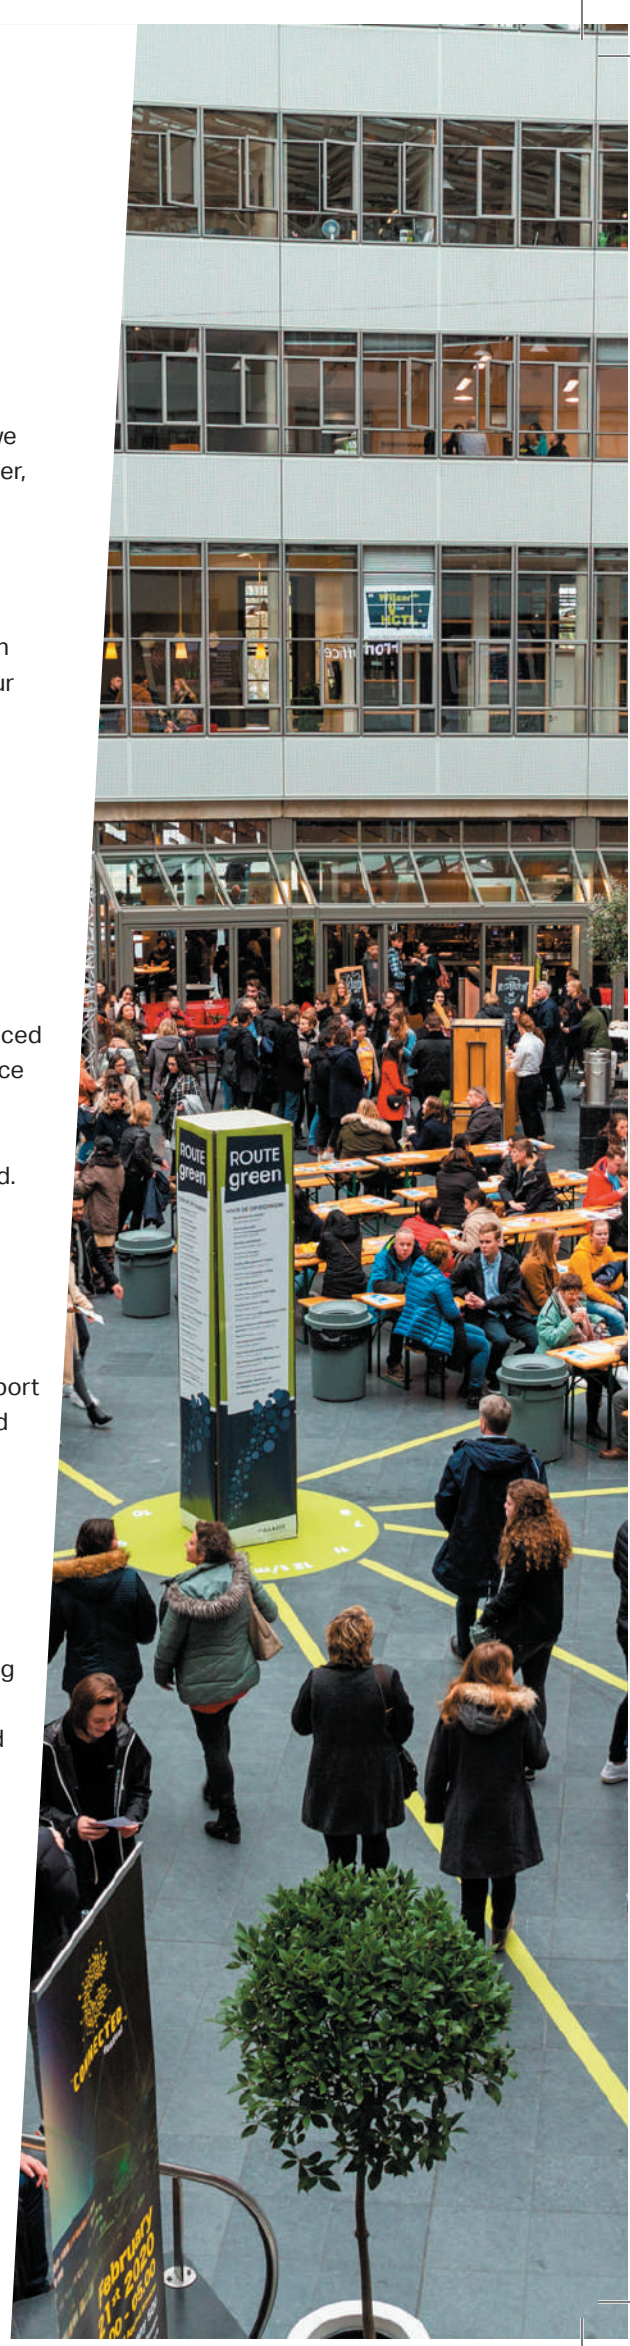

Of course, as an internationally oriented knowledge institution, we provide you with a diverse, inclusive environment in which individual opinions and differing perspectives are valued. Because our students, lecturers, researchers, and support staff come from more than a hundred countries, making our university of applied sciences an inspiring microcosm of the world. This diversity sharpens the mind and prepares our students for their futures as versatile professionals ready to contribute to a better, more just, and sustainable world.

And all of our curricula are built on those values, so we're delighted to welcome every student that identifies themselves with them. Studying at THUAS is more than just learning how to be good at your chosen profession. It's about becoming internationally orientated professionals that can solve major, real-life problems together. We're very excited to have you here, to help you develop new skills and to learn from you.

Elisabeth Minnemann
Chair of the Executive Board

WHY THE NETHERLANDS?

HERE'S WHY!

Education in the Netherlands is one of the most innovative systems in the world, based on student-led learning, debate and hands-on experiences. Dutch society is liberal and open-minded with a dynamic and multi-cultural scene. The Netherlands is a small country with a big international presence. Dutch multinationals like Philips, Heineken, KLM, Shell and Unilever contribute to making the economy 17th in the world. Best of all, you don't have to learn Dutch - almost everyone speaks English.

10 fun facts about The Netherlands

1. In our small country, there are about 17 million inhabitants from 190 different nationalities.
2. We celebrate King's Day on 27 April in honour of our King, Willem-Alexander.
3. Orange is our national colour.
4. Cycling is our favourite mode of transport. We have more bikes than people.
5. The Netherlands is as flat as a pancake and a quarter of our country lies below sea level. Luckily we have around 17,000 km of dikes.
6. Soccer is the most popular sport in The Netherlands. A bad performance by the national team causes major depression!
7. Dutch men are the tallest in the world.
8. We are the 5th happiest country in the world!
9. A popular Dutch snack is raw herring topped with onions.
10. Day-to-day weather can vary widely and rainfall can be unpredictable, so check your weather app.

On city life in The Hague

“ Here in The Hague I feel really accepted as an international student. People really open up when they notice that I'm from another country, I'd even say it's an advantage! And as a student you get to benefit from a lot of special discounts and events. What's more, I love the mix of modern and traditional architecture, and also the fact that nature is just on your doorstep. ”

Bianca Maria Leahu from Italy,
Law programme

WHY THE HAGUE?

HERE'S WHY!

The Hague is the perfect place to study – and to chill when you're not. If you are looking for an all-round experience, there are great beachfront cafés behind the dunes, many parks one third is green space, authentic international cuisine and a vibrant cultural scene. You'll find museums and activities for every taste, from Vermeer and Escher to Madurodam and Mauritshuis.

The Hague is the City of Peace and Justice and home to over 40 international organisations, such as the World Court, the International Criminal Court, the Lebanon Tribunal, Europol, chemical weapons watchdog the OPCW and over 120 NGOs. It's a small, welcoming city with a big international heart.

The Hague in a nutshell

- › International City of Peace and Justice
- › United Nations city
- › 500,000+ inhabitants from 180 countries
- › 40,000+ students
- › Seat of the Dutch government

WHY THE HAGUE UNIVERSITY OF APPLIED SCIENCES?

HERE'S WHY!

Let's change! You. Us. The World! That's our message at The Hague University of Applied Sciences (THUAS). We want to empower you to change and improve the world you live in, but that can only happen if we all work together to make a difference.

THUAS is a place where theory and practice meet. That's what makes us a university of applied sciences. During your time with us you'll be supported by our inspiring lecturers, your fellow students and an extensive professional network. When you complete your studies, you'll be able to start applying your knowledge and skills right away.

How we work

At THUAS, it's never just about studying: we're here to help you expand your horizons and grow personally. We encourage our students to become global citizens – to engage critically with the world around them and cultivate well-informed positions.

THUAS offers an innovative environment where almost 27,000 students from 126 countries come together to develop their own and each other's personal and professional potential and to exchange theoretical and practical insights. All our programmes are based on collaboration and simulate real-life situations.

In highly interactive classes, you can expect your lecturers to challenge you with questions, set engaging assignments and encourage in-class debates. That way, you can hone analytical skills that are critical in your future career.

THUAS has four campuses in The Hague, Zoetermeer and Delft, all with state-of-the-art amenities.

The big picture

As you pursue your degree, you'll gain hands-on experience from work placements at organisations in the public or private sector. This gives you the experience to put what you've learned into practice.

All our courses have a strong international emphasis with opportunities for placements in The Hague, the Netherlands, Europe and overseas. You can tap into THUAS's extensive alumni network and travel to countries like Japan, Argentina and the United States, if permitted.

Downtime

Becoming a global citizen is all about personal development. This is why we encourage our students to take part in our extracurricular activities, which focus on global and interdisciplinary issues.

Besides the more serious events, there are also plenty of opportunities to socialise and have fun. You can join one of THUAS's many student organisations: for example, an international association, the rowing club or even the student orchestra.

COLLABORATION

Research

Research is one of the pillars of our university, valuable in building connections with our partners and integral in binding knowledge, professional practice and society in one. Our research groups all deal with relevant and current social issues. To bolster our focus on research, seven Centres of Expertise have been built, which compose of various research groups who collaborate on a specific theme. These are long-term in nature and focus on collaboration with external stakeholders.

A key part of our approach is to forge strong connections among education, research and professional practice. We are:

Curious:

Lecturers and students are committed and take initiative in the dynamics between society, education and research.

Connecting:

We work within our networks of students and professionals on forging connections that lead to new insights and the mutual exchange of ideas.

Caring:

We are committed to creating a safe and enabling ethos that allows everyone to flourish, innovate and share knowledge and skills to create a better world.

Making connections

During your time at THUAS, you'll be able to make connections with public- and private-sector organisations and to build valuable professional networks in your field of study. These connections are a win-win for everyone: you learn from the experience of seasoned professionals, and they gain from your fresh perspective. It all adds up to theoretical and practical exchanges, which help you develop the professional and personal skills that society needs.

To promote economic and social development and to give you as many opportunities as possible, we work together with other academic institutions, businesses, governments and social organisations. These in turn generate internships, projects, labs, research and more. You have the option to work on local, regional, national or international levels.

A few examples of regional and national partnerships:

- In both education and research, we have developed numerous projects with the municipalities of The Hague, Delft and Zoetermeer, among others.
- At the regional level, we cooperate with organisations such as the Economic Board of South Holland, which brings together businesses, governments and knowledge institutions.
- We have also established partnerships with the ROC Mondriaan, Leiden University and other universities of applied sciences.
- We work with organisations such as the Netherlands Organisation for Applied Scientific Research (TNO), Haga Hospital and NGOs in The Hague region.

About International partnerships

As a networking university of applied sciences, our priority is to create synergies and opportunities that accentuate the quality of our education and research. To do this, we've built strong international partnerships with academic institutions outside of the Netherlands, such as The Hague Network and partners outside the EU. Through these bilateral partnerships, you'll be able to take advantage of student and staff exchanges and share research findings and other knowledge with peers at international institutions. All with the goal of having a positive impact on the world we live in.

Our Bachelor's & Master's programmes

- ✓ 45 full-time bachelor's programmes, of which 11 are taught fully in English
- ✓ Our bachelor's programmes take 3 to 4 years
- ✓ 10 master's programmes, of which 4 are taught fully in English
- ✓ Our master's programmes take 1 to 2 years

Our 7 faculties

- Business, finance and marketing
- Health, nutrition and sports
- IT and design
- Management and organisation
- Public management, law and safety
- Social work and education
- Technology, innovation and society

On global citizenship

“ You can really tell THUAS is internationally orientated. As students, we are strongly encouraged to team up with people from other cultures, so that we can learn from each other. This gives the entire school an atmosphere of tolerance and respect. The teachers have a broad international network that you can use to expand your own, whilst learning in a real-life environment. ”

Dara Dinanti from Indonesia,
International Communication Management
programme

Our facilities

- Dining** Have a delicious snack or meal served at one of the campus's restaurants, like WEST 75 on the main campus.
- Sports** Get the Hague Sport & Fitness pass to access all sports and gyms, like the new sports centre.
- Study/ICT** Find state-of-the-art study and work areas and wireless networks on every campus.
- Student life** Check out the various students associations for cultural events and activities organised by students.

Our other programmes

English Academic Preparation School

To improve your English language and study skills to meet the entrance requirements for one of our bachelor's or master's programmes

The Hague Summer School

A cutting-edge 2 to 4 week modular course for students who have at least completed their first year bachelor's degree

The Hague Pathway College

The Hague Pathway College (THPC) offers academic pathways in partnership with the university, which lead to globally recognised undergraduate degrees

Exchange and free mover programmes

For a truly international exchange experience of 6 months or 1 year come to THUAS, located in The Hague, the international city of Peace and Justice

The difference between a university of applied sciences and a research university

There are two types of universities in the Netherlands - traditional research universities (WO) and universities of applied sciences (HBO). Both offer bachelor's and master's programmes, but vary in their teaching methods.

HBO universities, like THUAS, put the emphasis on practical tuition and focus on your future career. You'll learn by working on 'real life' projects in close cooperation with the outside world.

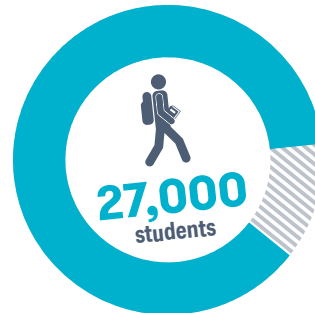

At a HBO university such as THUAS, you will do a compulsory internship or work placement to apply the theory you have learned into practice.

We focus on training and career preparation and work closely with professionals to make sure that our programmes are cutting edge and industry relevant. Businesses and institutions help design our curricula, which means they are hands-on, solution based and market ready. Our lecturers are working professionals, who'll give you first-hand insight into their field.

WO universities tend to run more theory and research-based courses and students attend larger lectures and work independently. HBOs have a more personal approach with smaller classes.

Please note: A THUAS bachelor will not necessarily qualify you for a master at a WO university in the Netherlands - you may need to take additional courses.

Our Bachelor's programmes

- ✓ **Tuition fees*:**
EU/EEA €2,530
Non EU/EEA €9,889
- ✓ **Application deadline:**
Non-EU/EEA: 1 May 2025
Dutch: 1 May 2025
EU/EEA: 1 May 2025

* Please visit www.thuas.com/tuitionfees to check our current tuition fees. New tuition fees are set annually.

At THUAS we offer 45 full-time bachelor's programmes, 11 of which are taught fully in English. Our bachelor's programmes normally take four years to complete. However, some of our programmes can be completed in three years. Please see the admissions requirements to find out which programmes you are eligible for.

All students go on an internship or work placement for one semester (half the academic year). The particular arrangements can vary in structure and can entail research or a more practical focus.

At THUAS, all of our bachelor's degrees are based on practical approaches to prepare you for your future career or master's programme and have an international dimension. Naturally, they also focus on your personal academic and professional development. You'll learn, according to your own style, through a combination of lectures, small seminars, tutorials, self-guided study, individual assignments, exams, practical assignments/projects and internship/work placement. You'll round it all off with your thesis.

Find out more about THUAS's bachelor's programmes at www.thuas.com/programmes/bachelors

European Studies (ES-4)

European Studies is an interdisciplinary study programme that empowers young professionals to pro-actively resolve the challenges facing organisations, businesses, and institutions in Europe today. Instead of focusing on a specific job, ES combines knowledge of Europe, professional skills and foreign languages to equip students for different careers in which they assist Europe's public and private sector organisations by giving policy advice (on government regulations, public affairs or sustainability), doing public relations, marketing or communications, engaging in fundraising or international trade. Master's Degrees in public policy, international relations or business are also an option, so if you want a career in Europe and you like business and politics – or don't know which you prefer – and you have a feeling for culture and languages, ES might be right for you.

- ✓ **4 years**

European Studies 3 (Accelerated fast-track) (ES3)

This fast-track version of our interdisciplinary Bachelor of Arts in European Studies takes students through Europe's public policy and businesses processes at high speed to help them prepare for a career at a European institution, organisation or business in policy advice, public affairs, marketing and communication or international trade, or for a master's degree in a related field (Public Administration, International Relations, International Business, etc.). It's a more intensive and challenging programme because it essentially combines the first and second year of the four-year European Studies bachelor into one foundation year and pushes students to develop themselves more independently and at a faster pace, while still including intensive foreign language learning and key professional skills. If you like politics and business – or don't know which you prefer – and you're up to the challenge, ES3 may be the right choice for you.

International Communication Management (ICM)

Our planet is facing huge challenges, such as climate change and mass social dislocation, which must be uniformly addressed. Yet, trust in business and political leaders is low. To solve these issues and restore trust, things need to change.

Are you open to make a positive difference in the world? Are you culturally sensitive and connected? Then it's time to open up your world at ICM.

During your three years in the ICM programme, you'll acquire skills in creative and critical engagement for a career helping companies, NGOs and governments take the right actions. This is business + impact.

International and European Law (LAW)

This International and European Law degree will prepare you for a career in the global legal arena. You'll gain a deep understanding of both public and private law, equipping you to navigate the complexities of international and European legal systems. And you will develop skills that will open doors for you upon graduation. Our full-time professionally-oriented programme is packed with real-world legal scenarios and skills-based assignments, all taught face-to-face.

Community and Connections

Not only will you become highly employable, but you will also forge lasting connections and become a valued member of our law community. You'll work closely with our approachable lecturers, who will share their extensive international legal experience. Studying in The Hague, the city of Peace and Justice, gives you the perfect platform to launch an impressive legal career.

International Public Policy and Leadership (IPPL)

The International Public Policy and Leadership programme gives you the tools to change the world through finding tangible solutions. Our students want to 'roll up their sleeves' and 'get stuck in' - to learn how to unravel big issues with practical know-how. The hands-on IPPL programme means students learn the 'how tos', adopting the right tools to help them to unpick big issues. To become real game-changers in society. At a university of applied sciences, you will learn by doing and adopt an entrepreneurial way of thinking, seeking the right answers along the way. You'll sharpen your analytical and critical skills as you work on pressing national and international issues in such areas as human rights, peace and security, international trade and the environment. You are then ready for a career in such areas as project management, consultancy and policy making.

International Sport Management (ISPM)

The International Sport Management (ISPM) programme offered by THUAS teaches you the fundamentals of what it means to become a sport manager. The skills you obtain from this programme varies from becoming a leader, how to give your best performance and how to work in a team efficiently. This programme offers you the opportunity to work in an international environment during your studies and give you the chance to study abroad. The ISPM programme is determined to create the game changers in the sport industry by teaching you about personal and professional development. Students can choose their own minors and determine the direction of their own development and professional profile. Finally, the game changer attitude you develop in the first two years can be applied to your mandatory internships.

Process & Food Technology (PFT-4)

Companies worldwide are carefully reevaluating their production processes to comply with sustainability goals. There is a lot to be done: developing more efficient and environmentally friendly production processes, creating smarter food and manufacturing more sustainable consumer products. Do you want to help companies address the challenges of your time? Then the 4-year Process & Food Technology (PFT) degree programme could be right for you. You will learn everything about the many different production processes, so you can help improve and renew them. Your interest in technology and science will very much come in handy here. After completing this international (English-language variant) degree programme, you will be ready to work anywhere in the world. Where will you make the most impact?

Safety and Security Management Studies (SSMS)

This programme is all about ensuring the safety and security of people, organisations and public spaces. You'll learn how to formulate safety and security requirements and to work with others on their implementation. There is a growing demand for professionals who can do just that. And as you work closely with your peers on practical assignments, you'll get all the advice and support you need from our lecturers.

* of the total % of graduates who continue their study

- ✓ **4 years**
- ✓ **The Hague, Main Campus**
- ✓ **67%** find a job within 4 months after graduation
- ✓ **60%** do their master's degree after graduation*

SSMS Year 1 (cohort 2023) — 60 ECTS

Semester 1	Semester 2
Intro to safety & security	Business & safety management
Governance & policy	Law & compliance
Society & politics	Psychology & crime
Applied research design	Applied research techniques
Fundamentals of academic writing	Professional writing skills
Professional skills	Research project

SSMS Year 2 (cohort 2022) — 60 ECTS

Semester 1	Semester 2
Globalisation, safety, & sustainability	Crisis management & communication
Culture, policy, & management	Conflict studies & peacebuilding
Safety and security risk management	Geopolitics & national security
CPTED project OR Auditing project	Security risk management project OR Serious gaming project
	Quantitative & qualitative data analysis

SSMS Year 3 (cohort 2021) — 60 ECTS

Module 9*	Module 10*	Module 11*

User Experience Design (UXD)

Bachelor of Science in Communication and Multimedia Design

UXD is all about designing digital products that meet the end user's experiences, emotions, values and goals. You'll learn to put various research and design methods to work in creating meaningful digital experiences. You'll try out various technical solutions as you explore new avenues of user-focused research. By prototyping your innovative concepts, you'll be able to hone your creative and critical design skills.

Our Master's Programmes

If you've finished a bachelor's degree and want to further develop your knowledge and skills, a master's programme could be the next step to achieve this. The Hague University of Applied Sciences offers a range of master's programmes and professional courses in both Dutch and English.

Four master's programmes are taught entirely in English and have a strong international flavour. The full-time version takes one year. The part-time version takes two and is open only to students with full Dutch residential status. MNLE is offered in a full-time version only.

We understand what matters and provide education with a clear focus:

- Learn skills today; apply them tomorrow
- Small enough to care, big enough to lead
- An international focus with local understanding

- ✓ **Duration:**
1 year full-time or
2 years part-time
- ✓ **Accreditation:**
NVAO
- ✓ **Location:**
The Hague, Main Campus

Find out more about THUAS's master's programmes at www.thuas.com/programmes/master

Master Next Level Engineering (MNLE) (New!)

- ✓ **Tuition fee*:**
EU/EEA €2,530
NON EU/EEA €9,980
- ✓ **Application deadline*:**
Non-EU/EEA: 31 May 2025
EU/EEA: 15 August 2025
- ✓ **Title:** Master of Science

What is the master 'Next Level Engineering' about?

The Master Next Level Engineering will provide you all the necessary tools you need as 'the engineer of the future', equipped to face identified societal challenges like climate change, the ageing workforce and increased demand for healthcare.

Next Level Engineers will play an essential role in bringing disciplines together, by thinking cross border with an eye for the greater good and world citizenship; in short keeping in mind people, planet, and prosperity. Therefore, all activities will be in the perspective of deploying sustainable (industry) activities worldwide.

You will be introduced to modern technical fields such as Smart Industry/Industry 4.0, Agriculture Technology (AgTech), HealthTech and Energy. You will learn how to apply all kinds of Key Enabling Technologies (KETs): technologies that enable breakthrough innovations in the market. On top of that, Data Science and Applied Research skills will also be a prominent part of your engineering skillset.

* Tuition fees and application deadlines are set annually. Please check www.thuas.com for update

What are the traits of the typical 'Next Level Engineer'?

The Next Level Engineer has:

- abstract insight into complex engineering issues;
- technical expertise on bachelor level, combined with a broad view of surrounding technical fields (KETs) and applied research skills on master level, and well-developed communicative skills.
- awareness of the impact on business and society, thereby taking sustainability into consideration.

The Next Level Engineer is capable of:

- getting the technical job done, as well as connecting different engineering disciplines.
- collaborating in multidisciplinary teams.
- 'self-education', making you more resilient towards changes in the professional field.

Admission requirements and career prospects

The admission requirements are:

- bachelor's degree in the technical field (e.g. any of the technical or engineering THUAS programmes)
- good command of English language
- mandatory intake interview

When you successfully complete this master, you will receive the Master of Science degree. As a next level engineer you can, for example, start working at

- technical consultancy companies
- technical health innovation companies
- sustainable energy companies
- smart industry companies

Curriculum*

The one-year Master's in Next Level Engineering (60 EC) consists of two semesters of 30 EC each

Semester 1	Semester 2
First half of Semester 1 <ul style="list-style-type: none"> • Key Enabling Technologies (10EC) • Applied Data Science (5EC) Second half of Semester 1 <ul style="list-style-type: none"> • Design and prototyping (15EC) 	One third of the Semester 2 <ul style="list-style-type: none"> • Applied Research (10EC) Two third of Semester 2 <ul style="list-style-type: none"> • Graduation research (20EC)

Please check www.thuas.com/programmes/masters/master-next-level-engineering for the most up to date information on the curriculum.

Master of Business Administration (MBA)

- ✓ **Tuition fee*:** €22,995
- ✓ **Application deadline*:**
Non-EU/EEA: 1 May 2025
Payment: 31 May 2025
EU/EEA: 31 July 2025
Payment: 31 July 2025
- ✓ **Title:** MBA

Investing in your future is key to giving your career the boost it needs.

Investing in your future is key to giving your career the boost it needs. With a Master of Business Administration (MBA), you can develop your business acumen, gain a global perspective, and become well-equipped for executive and strategic roles in the future. Our MBA programme is specifically designed for ambitious professionals who aspire to take on leadership and management positions in their careers. Join our programme today and take the first step towards achieving your goals.

Depth and breadth

Unlock your potential with an MBA that broadens your horizons and enhances your career prospects. Our programme offers a strategic perspective on business that will change your mindset and help you tackle complex challenges with confidence. You'll gain a deeper understanding of the impact of internal and external factors on organizations, as well as the latest technological and economic trends. Moreover, you'll learn to appreciate the importance of social responsibility, ethics, and sustainability in the modern business landscape. With our MBA, you'll be ready to take your career to new heights and make a positive impact on the world.

Components of leadership

Leadership in today's global business world demands a unique set of skills. To succeed, you need to be analytical, strategic, and able to manage both people and risks effectively. At our master's programme, we recognize the importance of these competencies and provide you with the tools to develop them. Our programme emphasizes personal leadership, which is integrated into the regular curriculum during the first half of the programme. Through a real-world consultancy project, you'll have the opportunity to apply theoretical knowledge and practical skills gained in previous modules. In the Integration Module, you'll bring it all together, synthesizing what you've learned and demonstrating your ability to tackle complex business challenges.

Competitive edge

In today's competitive job market, an MBA is the key to unlocking your leadership potential and staying ahead of the curve. As the world's most prestigious post-graduate degree, an MBA is a must-have credential for aspiring leaders who want to take their careers to the next level. With an MBA, you'll gain the skills and knowledge you need to succeed in top management roles. You'll complete the programme by conducting independent research on a key business problem, culminating in a thesis that showcases your expertise and innovative thinking. With this comprehensive approach to leadership development, you'll be well-equipped to meet the demands of the modern business world and become a successful leader of tomorrow.

* Tuition fees and application deadlines are set annually. Please check www.thuas.com for update

Master Financial Management and Control (MFMC)

- ✓ **Tuition fee*:** €22,995
- ✓ **Application deadline*:**
 Non-EU/EEA: 1 May 2025
 Payment: 31 May 2025
 EU/EEA: 31 July 2025
 Payment: 31 July 2025
- ✓ **Title:** Master of Science

Discover the world of finance and control with our hands-on master's programme.

Our three learning lines - Finance & Control, Human & Control, and Research & Control.

International, intercultural

With globalisation and the growth of markets, companies increasingly adopt a data-driven mindset in the globalized market, our programmes focus on data analytics, BD BI, and intercultural business aspects that will prepare you to be a successful financial decision-maker in any organization.

The skills you need

Gain crucial skills in earnings, expenditures, loans, and investments, and learn how to create effective business strategies. Our practical and applied-research assignments, case studies, and group projects with diverse teams will deepen your knowledge and experience in each block. You'll be prepared to use your knowledge of the market, the economy and organisations to create business strategies.

Growth and progress

A programme requirement is working on group assignments with a different team for each block. You'll gain experience with practical and applied-research assignments and case studies. With each block, your knowledge will deepen and you'll become more familiar with the various aspects of Finance and Control.

This master's degree focuses on data-driven business control. The programme fits in perfectly with what you experience in the professional field. Because of the high degree of integration of work and study, everything you learn during the master you can apply directly in the work situation you aspire.

* Tuition fees and application deadlines are set annually. Please check www.thuas.com for update

Master International Communication Management (MICM)

- ✓ **Tuition fee*:** €21,995
- ✓ **Application deadline*:**
Non-EU/EEA: 1 May 2025
Payment: 31 May 2025
EU/EEA: 31 July 2025
Payment: 31 July 2025
- ✓ **Title:** Master of Art

With a dual focus on theory and practice, sharpen your international management communication skills!

Facts first

"In today's fast-paced world, every organization - whether it's a government entity, an international organization, or a multinational corporation - needs a well-planned communication strategy. Effective communication is key to build a strong organizational profile, but in a world where communication practices are constantly scrutinized, it's important to stay true to your message. Even a hint of doubt can lead to charges of 'fake news'. As an organization, how do you respond? How do you use communication strategies to showcase your corporate identity and strength, both internally and externally? In this globalized world with its diverse customs, traditions, and cultures, how do you communicate persuasively, cogently, and compellingly?"

Constant refresh

Our master's programme in International Communication Management equips you with the skills and knowledge to tackle these challenges head-on. Learn how to develop communication strategies that reflect your organizational values and build a positive brand image. Explore the intricacies of cross-cultural communication and master the art of persuasive communication. MICM takes a unique approach that combines both theoretical and practical elements, as well as a blend of individual and group assignments, all facilitated by intercultural teams. Each module is presented as a masterclass, providing you with an immersive and engaging learning experience. This programme is designed specifically for individuals who are looking to enhance their communication and leadership skills within a global context. Whether you're looking to advance your career or gain a competitive edge in the job market, our programme will equip you with the knowledge and skills necessary to succeed. Join us and develop the confidence and expertise to lead in a rapidly evolving global environment.

International setting

At our university, we offer an innovative and intercultural learning environment that brings together students, lecturers, and alumni from every corner of the world. This allows you to build a global network during your studies and learn from your peers on a weekly basis. Our classroom is a melting pot of cultures and work experiences, with students and lecturers hailing from different occupations and nationalities. Our experienced lecturers, who represent six different nationalities, are all experts who work or conduct research in the field, providing you with highly relevant and up-to-date knowledge. By joining our programme, you'll not only gain a world-class education but also develop a global mindset that will serve you well in your career. Join us and become part of a diverse and dynamic community of learners.

Transformative messaging

At the end of the programme, you can prove yourself as an independent communication professional and researcher as you compose your master's thesis.

Our other programmes

At THUAS we also provide shorter international programmes. We offer a range of exchange programmes, summer school modular courses that focus on solving global challenges, PREP School – offering support to international students before they start their degree – and The Hague Pathway College.

Find out more about THUAS's other courses
www.thuas.com/programmes/other-courses

The Hague Summer School

Do you want to make a big difference by tackling critical global issues? Are you keen to learn how to take an interdisciplinary approach in unpacking these topics? The Hague Summer School (THSS) in the Netherlands offers two editions of an innovative programme. Each two-week edition brings together professionals from both the public and private sectors to examine some of the world's most pressing issues, and to challenge our students to devise creative and sustainable solutions.

THUAS encourages its students and faculty alike to pursue transformative change – significant and lasting improvements to the world we live in. There is no better place to investigate and pursue these initiatives than The Hague – International City of Peace and Justice and the political heart of the Netherlands.

The programme is divided into two: a general module in the morning and electives including project work or field trips in the afternoon. You can opt to join the first two-week course with a choice of four electives: Peace, Justice & Human Rights; The Impact of Migration; Youth in Democracy; or Sustainable Entrepreneurial Thinking. The second edition has a set programme on Global Affairs. The full four-week edition is the best option if you would like to get the most from THSS. The practical application of the United Nations Sustainable Development Goals serves as the foundational theme of our summer programme.

✓ **Summer School**
July 2025

✓ **Tuition fees*:**
Tuition fees are set annually. Please check www.thehaguesummerschool.com for updated figures.

Duration:
2 or 4 weeks

✓ **Language of instruction:**
English

✓ **Location:**
THUAS Main Campus

✓ **Periods:**
Starting in September and February

* The one-time fee includes tuition, accommodation, lunches and coffee, as well study materials, books and cultural and social activities.

Anyone who has completed at least the first year of a bachelor's degree is eligible to apply. You should have a good working knowledge of English (level B2 or higher).

Upon successful completion of the two-week edition of THSS, you'll earn 4 credits or for the four-week edition, 8 credits (European Credit Transfer System ECTS)

Exchange & free movers

Do you want to go on exchange to one of the best destinations for an experience abroad? Look no further. For a truly international exchange experience come to The Hague University of Applied Sciences. Located in The Hague, the international city of Peace and Justice and its region

The university participates in the Erasmus+ programme. We also have a large number of bilateral agreements that enable students from all over the world to join us for a semester or academic year.

THUAS offers a wide range of courses to exchange students that are completely taught in English ranging from Business to Engineering and Social Work to IT. The specific subject area that you can choose courses from depends on the type of agreement that has been signed between us and your home university. If you are a free mover, a student of a non-partner institution of THUAS and you would like to do an exchange, you need to meet the pre-requisites for the course as well have a good command of the English language. (IELTS 6.0 or TOEFL 213 or 80). Studying at THUAS means you will study in an international environment with students

from almost over 140 different countries. All of our programmes revolve around group and project work and simulate real-life situations. During interactive classes, your lecturers will ask questions, set assignments and encourage debates and presentations to hone analytical skills that are critical in your future job.

Of course there is plenty of time to meet new people, be involved in different student organisations, explore the Netherlands and Europe and most importantly make new friends from all over the world!

- ✓ **Duration:**
6 months or 1 year
- ✓ **Language of instruction:**
English
- Location:**
All campuses
- ✓ **Periods:**
Starting in September and February

Want to learn more on the possibilities to come and join us for your exchange as an exchange or free mover student, please get in touch with the Erasmus/ International Office of the exchange coordinator of your home university. They can inform you on the procedures and can help you with the application process.

THUAS has over 350 exchange partners and a close collaboration in more than 50 countries: from Brazil to China, from Australia to The United States and several countries throughout Europe.

THUAS has over 400 exchange partners and a close collaboration in more than 50 countries: from Brazil to China, from Australia to The United States and several countries throughout Europe.

The Hague Pathway College – International Foundation Programme

Located right on the The Hague University of Applied Sciences (THUAS) campus, The Hague Pathway College (THPC) offers academic pathways in partnership with the university, which lead to globally recognised undergraduate degrees.

The Hague University of Applied Sciences offers you the opportunity to follow an international foundation programme after which you will be admissible to our 3-year English-taught bachelor's programmes. The international foundation programme combines academic study, English language training and study skills to prepare you for degree-level study.

After successfully completing The Hague Pathway's College International Foundation, you

will have guaranteed admission to the bachelor's programme you chose without any additional testing such as IELTS.

Next to the programme's academic focus, there is plenty of support and many social activities to help you settle into your new country. There are also optional Dutch classes with a focus on Dutch language and culture to help you feel more integrated into society. You will be amazed at how quickly you can make new friends.

	International Foundation - One year	International Foundation - Fast-track
Duration	September - June	January - June
Application deadline	14 July	1 November
Tuition fee	€13,930	€10,950
General English Language Requirements	IELTS 5.0 overall (5.0 in writing and no other scores below 4.5) or equivalent in TOEFL, TOEIC and Cambridge English*	IELTS 5.5 overall (5.5 in writing and no other scores below 5.0) or equivalent in TOEFL, TOEIC and Cambridge English*
Academic Entry Requirements	Secondary school leaving certificates, with good grades in relevant subjects, are accepted from most countries in the world	

Undergraduate degrees

The International Foundation programme prepares students to progress to the following 3-year bachelor's degree programmes at The Hague University of Applied Sciences:

Management and Social Sciences	Technology and Design
• BBA International Business	• BSc Industrial Design Engineering
• BSc International Financial Management and Control	• BSc Process and Food Technology
• BA European Studies	
• BA International Communication Management	
• BA International Sport Management	
• BSc User Experience Design	

The teaching programme has a unique and innovative approach by offering an integrated approach to developing English language skills, academic skills and subject knowledge like Mathematics, Physics or Business. During the foundation programme you will work on projects with other students from around the world. Just like you will do when starting your bachelor's programme at The Hague University of Applied Sciences.

Improve your academic and English skills

Make friends with students from across the globe

Adjust to a new home with personalised support

For more information please visit: www.thehaguepathway.nl

The Hague Pathway College brings you a step closer to your academic dream and offers you an unforgettable learning experience.

The Hague Pathway College – English Academic Preparation Programme

The English Academic Preparation Programme helps you improve your English and academic skills and is a perfect springboard to your studies in the truly international city of The Hague.

The English Academic Preparation Programme is taught by The Hague Pathway College, as a close partner of The Hague University of Applied Sciences. The programme will help you gain the level of English and study skills you need to enroll in The Hague University of Applied Sciences English-language bachelor's or master's degrees.

The students work in an international and interactive learning environment, developing

academic skills such as researching, reading and essay writing, as well as presenting skills and working in teams on projects.

At the end of the programme all students will take the IELTS test. The goal is to score at least 6.0 which is the progression requirement for The Hague University of Applied Science bachelor & master degree programmes. The tuition fee includes one IELTS test.

Undergraduate and Postgraduate degrees

The English Academic Preparation Programme prepares students to progress to the following 4-year bachelor's degree programmes and master's degree programmes at The Hague University of Applied Sciences:

GET READY!

Deciding what and where to study after you leave school is an important decision and we want you to get it right in order to ensure your future success. To help you with this, THUAS offers a number of resources and events. If you've chosen to study at THUAS, let's start ticking the boxes on our practical checklist and complete the right paperwork to start your new journey abroad.

Choose the programme that's right for you

Need some help deciding on the right programme? These events and activities will give you a taste of THUAS.

Open days

Open days at THUAS are the ideal opportunity to find out about study programmes, speak first hand to students and lecturers and tour the impressive campus.

Find out about the next open day at www.thuas.com/open-day

Online Open Days

THUAS regularly holds Open Days that aim to give our prospective students a sense of what life would be like for them here. To complement these, we now offer Online Open Days, which also feature live webinars. On the page below, you can also find videos of all programme webinars held so far.

www.thuas.com/study-choice/open-day

Shadow a student

Find out what a typical day of study is like for one of our students and spend the day with them. You can arrange this with your chosen programme.

www.thuas.com/study-choice/day-student

Live Q&A Sessions & Webinars

Whether you'll be enrolling at THUAS or are still mulling your options, why not join us for one of the online sessions we regularly hold to answer your questions, offer advice and point you to further resources? Topics that come up include student life, finances, housing and life in the Netherlands. To find out more and to see when the next sessions will be held, please visit

www.thuas.com/study-choice/online-information-sessions

Meet us around the world

You don't need to jet into The Hague to get more information about our English bachelors and master's programmes. We'll bring the information to you. Meet us in your home country, or one that's close by and get the lowdown on our programmes.

Meet our representatives around the world

Our representatives stationed around the globe can also talk you through our programmes and entry procedures. Albania, Azerbaijan, Brazil, Bulgaria, China, Colombia, Croatia, Czech Republic, Egypt, Estonia, Georgia, Greece, Hungary, Indonesia, Italy, Ireland, Kazakhstan, Latvia, Lithuania, Mexico, Moldova, Nigeria, Poland, Portugal, Romania, Russia, Slovakia, Spain, South Korea, Ukraine, United Kingdom and Vietnam all have representatives.

It's quite possible that we'll be at an education fair near you, or that our representative is based in your home city.

Ask a student, graduate or lecturer

Our current students and alumni can give you a real insight and honest opinions about life on campus, specific study programmes and what the future holds after graduation. Get in touch via our Facebook page at www.facebook.com/thehagueuniversity, or through your programme.

Our Tips and Tricks Page

Once you've decided on THUAS, visit our Tips and Tricks page. It has lots of useful information and practical tips on student life here.

www.thuas.com/student-101-top-tips-studying-thuas

THUAS to-do list

- ✓ Decide which programme is right for you by attending one or more of THUAS's events
- ✓ Find out if you meet the admission requirements
- ✓ Start your preparations well in advance (at least a year)
- ✓ Check out if you can apply for a scholarship
- ✓ Apply for your visa, residence permit and health insurance
- ✓ Find accommodation in The Hague
- ✓ Link up with other students by following us on Facebook at www.facebook.com/thehagueuniversity and Instagram [@thehagueuniversity](https://www.instagram.com/thehagueuniversity).

Our academic year

Our academic year starts around 1st September and ends in mid-July. It's divided into two semesters, which are broken down into two periods of six weeks, with a week free between them. The free weeks fall in February/March, May and October. There is also a two week Christmas break.

For the latest information on study choice events and activities check: www.thuas.com/study-choice/help-in-choosing-your-study

STEP
2

Admission requirements

Applying for bachelor's programmes

You'll need the equivalent of a Dutch HAVO or VWO diploma to apply for our bachelor's programmes. If you hold a non-Dutch diploma, your eligibility will be assessed against Nuffic guidelines (www.nuffic.nl).

Once you have filled out the relevant forms and applied, it's time to sit tight and wait while the admissions committee consider your application. This process can take several weeks.

 Find out more about application requirements at www.thuas.com/enrolment

What if you don't meet the entry requirements?

Don't worry, there are still alternative ways to help you get in.

21+ admissions test

If you're 21 before 1 September 2024 but don't have a diploma or a qualification that meets the entry requirements, you can take the 21+ Admissions Test. To be eligible to participate, you must be a citizen of a EU/EEA country or Switzerland, or already have a valid residence permit for the Netherlands.

 Find out more at www.thuas.com/21plus

The Hague Pathway College

If you'd like to apply for a 3-year bachelor's programme but don't meet the academic entry requirements, you might be interested in joining The Hague Pathway College, offered by our authorised partner Navitas. Their one year foundation programme will offer you the chance to bring your academic level up to the required level. If needed, there is the opportunity to work on your English at the same time.

 Find out more at www.thehaguepathway.nl

When you have chosen your programme, it's time to find out if you meet the admissions requirements.

Applying for master's programmes

The entry requirements for our master's programmes vary according to the programme. Applicants must be aged 22 or older and all three of our masters require a minimum of two years of relevant work experience. Masters applicants must have a bachelor degree from a recognised university or academic institution.

Find out more at www.thuas.com/programmes/master

English language requirements

Our international bachelors and master's programmes are taught entirely in English, so you'll need a good command of spoken and written English.

If you're educated in the Netherlands, UK, Ireland, USA, Canada (except Quebec), Australia, New Zealand, South Africa, Malta, or hold a diploma (including English as an exam subject) listed at www.thuas.com/enrolment, you don't need to take an English proficiency test.

If you are applying for a master's programme and have completed an English-taught bachelor's programme, you may also be exempt from an English proficiency test.

All other applicants are required to have a valid and sufficient English proficiency test.

Find out more at www.thuas.com/study-choice/applications-finances-and-moving-here/entry-requirements

Applying for the English Academic Preparation programme

If you don't have the proficiency in English that you need in order to enrol on your chosen programme, you can apply for the English Academic Preparation programme, or Prep School, which takes six months or one year. On completion of this course, you'll be ready to join a bachelors programme and will have a working knowledge of The Netherlands, The Hague and THUAS under your belt.

To be admitted to Prep School, you need to be eligible for the programme you wish to take after completing the course and have an IELTS or TOEFL test result with sufficient score.

Find out more at www.thuas.com/programmes/exchange-programmes-other-courses/english-academic-preparation-programme

Applying for The Hague Summer School

The Hague Summer School is open to anyone who has completed a first year bachelor's degree, or already has a bachelors degree. So both undergraduate and graduate students are welcome to apply. You should have a good working knowledge of the English language (level B2 or higher) before you apply.

The last entry criteria to The Hague Summer School is your ambition. When you apply, 'motivation' is one of the most important parts of the selection process.

Find out more at www.thuas.com/programmes/other-courses/the-hague-summer-school-eng

Good to know

All THUAS programmes are accredited by The Accreditation Organisation of the Netherlands, www.nvaio.com

Scholarships and finances

EU/EEA and non-EU/EEA students pay tuition fees for bachelor's and master's programmes. So it's time to do the maths and explore the loans, grants and scholarships that may be available to finance your studies at THUAS.

Bachelor's and master's programmes

EU/EEA bachelor's students pay €2,530 per year and most non-EU/EEA pay €9,889. Tuition fees vary between €21,995 and €22,995 for a masters.

Please visit

www.thuas.com/tuitionfees to check our current tuition fees. New tuition fees are set annually.

Other Programmes

The Hague Summer School has a one-off fee which covers all of your main costs including tuition, accommodation, lunches and coffee breaks on class days, study materials and in-programme cultural visits and social activities.

The four-week course costs €3,045 (shared room)/€3,175 (single room) and the two-week course costs €1,795 (shared room)/€1,895 (single room), but discounts may apply. Prep School costs €5,300 for the half-year and €9,000 for the full year course. Please note that these were the fees for the 2024 programme. Please check the link below for our current fees.

www.thuas.com/programmes/exchange-programmes-and-other-courses

On the cost of living

“ What should you consider as a monthly budget? I'd say around €1000 per month would suffice, depending on your lifestyle. If you shop at The Hague Market and do most of your travelling by bike, you can save a lot of money. Side jobs aren't too hard to find, especially if you speak a little Dutch. I got very lucky: as a chauffeur, I get to drive people around in their own cars for quite a good salary. ”

Jakob Grüter from Germany, alumnus
International Public Policy and Leadership programme

Scholarships

International students should check if any scholarships are available in their home country. Your local Dutch embassy and present college or university should be able to help with information.

It's also worth checking to see if you are eligible for THUAS's The Netherlands Scholarship.

Find out more at

www.thuas.com/scholarships

Monthly expenses

You'll also need to take your monthly expenses on accommodation, food and living into account and budget for your time at THUAS.

Experience has shown that students living in the Netherlands for one year spend between €800 and €1,100 a month.

An average room in the Netherlands costs somewhere between €500 and €800 a month. The costs depend on the type of room you have, what is included in the rent, if the room is furnished, if you will have to share your room (or the facilities) and the size of the room. Don't forget to budget about €650 per year for medical insurance. Bachelors first year students will also need to invest from €500 to €800 on books and materials.

For groceries, you should expect spending between €250 and €350 per month, depending on your diet. A return train ticket from The Hague to Amsterdam costs around €24.40.

Find out more about financing your bachelor study and living in the Netherlands at

www.thuas.com/financing-your-bachelor-study

STEP 4

Visas and permits

EU and EEA students don't need a visa to enter the Netherlands. All other students in general require an entry visa and/or residence permit.

If you do require a visa or residence permit, the good news is that THUAS will apply on your behalf. All you have to do is transfer a package fee and upload the relevant documents. More information about the procedure and documentation will be provided after acceptance.

Find out more about visas and permits at www.thuas.com/study-choice/applications-finances-and-moving-here/immigration-and-visas

STEP 5

Accommodation

Looking for a place to live in The Hague or one of its satellite cities can be a challenging experience, our advice is to start house hunting as early as possible. Since the process of finding the right student accommodation is not that simple, THUAS has reserved a number of rooms and studios with our housing partners.

If you pay the THUAS housing service fee, you can make use of the accommodation that is already reserved through the university. The number of rooms is limited and are allocated on a first paid first serve base. Having a legitimate address is a prerequisite for obtaining a residence permit.

Find out more about living in The Hague at www.thuas.com/housing

On THUAS' housing service

“ Finding living space is a lot easier when you're on site. That's why we do it for you! With a selection of 600 rooms and apartments, we try to cater to different tastes and budgets. That way most first-year students have a good shot getting into one of different locations, all within reasonable travelling distance of THUAS. ”
